Conference Scope

The 1st National Conference on Advanced Transportation Engineering, Logistics, and Environment (NCATELE'24) aims to foster the exchange of experience and knowledge among national researchers, while identifying key themes, from the design and functionality of engineering sciences to their innovative applications. The conference will be conducted in hybrid mode, allowing authors to present their papers either in person or online.

The scientific program includes a keynote address, oral presentations, and poster sessions.

The expected outcomes of this conference are to raise awareness among decision-makers and industrial leaders about the critical importance of promoting physicists and integrating them into the economic and technological sectors.

The organizing committee also encourages socioeconomic companies to present their challenges, which could potentially be addressed by university researchers, as well as showcase their products, equipment, services, and the impact of applied sciences and technologies on industry.

"The conference Book of Abstracts will be submitted for an online publication with ISBN & Book Level Single DOI. Indexing: Google Scholar."

Conference topics

1 - Transportation Engineering

2 - Logistics and Supply chain

3 - Electrical Traction

4 - Hydrocarbon Transport

5 - Industrial Hygiene, Safety and Environment
