

TOPICS

Area 1 Food and Public Health

Food intolerances and allergies
Feeding behavior and nutrition habits
Metabolic diseases
Nutrition for specific population groups
Food toxicology

Area 2 Functional Food and Health

Microbiota and gut health
Probiotics and prebiotics
Dietary supplements
Enteral and parenteral nutrition, and oral supplements

Area 3 Innovative Products and Health

Bioactive packaging and food preservation
Product formulation and transformation technologies

Area 4 Artificial Intelligence in Food Sciences

Bioinformatics applications
Modeling, simulation, and predictive techniques
Machine learning
Deep learning

Presentation

Algeria progressively engaging in a scientific and technological approach aimed at modernizing its food system while preserving its natural resources.

In terms of sustainability, national research programs encourage the sustainable use of agro-industrial resources and the recovery of agricultural by-products, thus contributing to the development of a circular economy.

Innovation also represents a central pillar in the development of the sector. Research teams, in collaboration with universities and industry, are engaged in the formulation of new value-added products such as functional foods, bioactive packaging, and technological processes aimed at improving food preservation and safety. The integration of emerging technologies, such as artificial intelligence, bioinformatics, and process modeling, paves the way for scientific modernization aligned with international standards.

Finally, health lies at the heart of national priorities. Research in human nutrition, the prevention of metabolic diseases, and the promotion of balanced diets are key components of public policy.

Initiated in 2014 and renewed in 2018 under the name "International Seminar on Food Sciences (SISA)," the event was launched in 2024 as the First International Congress on Food Sciences, following the positive feedback received from previous editions, which have evolved in line with ongoing research and contextual aspirations. Thus, for the year 2025, the Second International Congress on Food Sciences (CISA 2025) is held under the slogan "Sustainability, Innovation, and Health."

Location:

Campus of the Institute of Nutrition, Food and Agro-Food Technologies (INATAA), 7th Kilometer, Setif road, Constantine.
